Relevant MRE Experience

Summary – MRE Experience

An aerial photograph of a large, dark-hulled vessel, the Scotia Tide Halifax 100, equipped with a large, curved, yellow and white structure on its deck, likely a tidal turbine. The vessel is positioned in a body of water, with a smaller boat visible in the distance. The text is overlaid on the image.

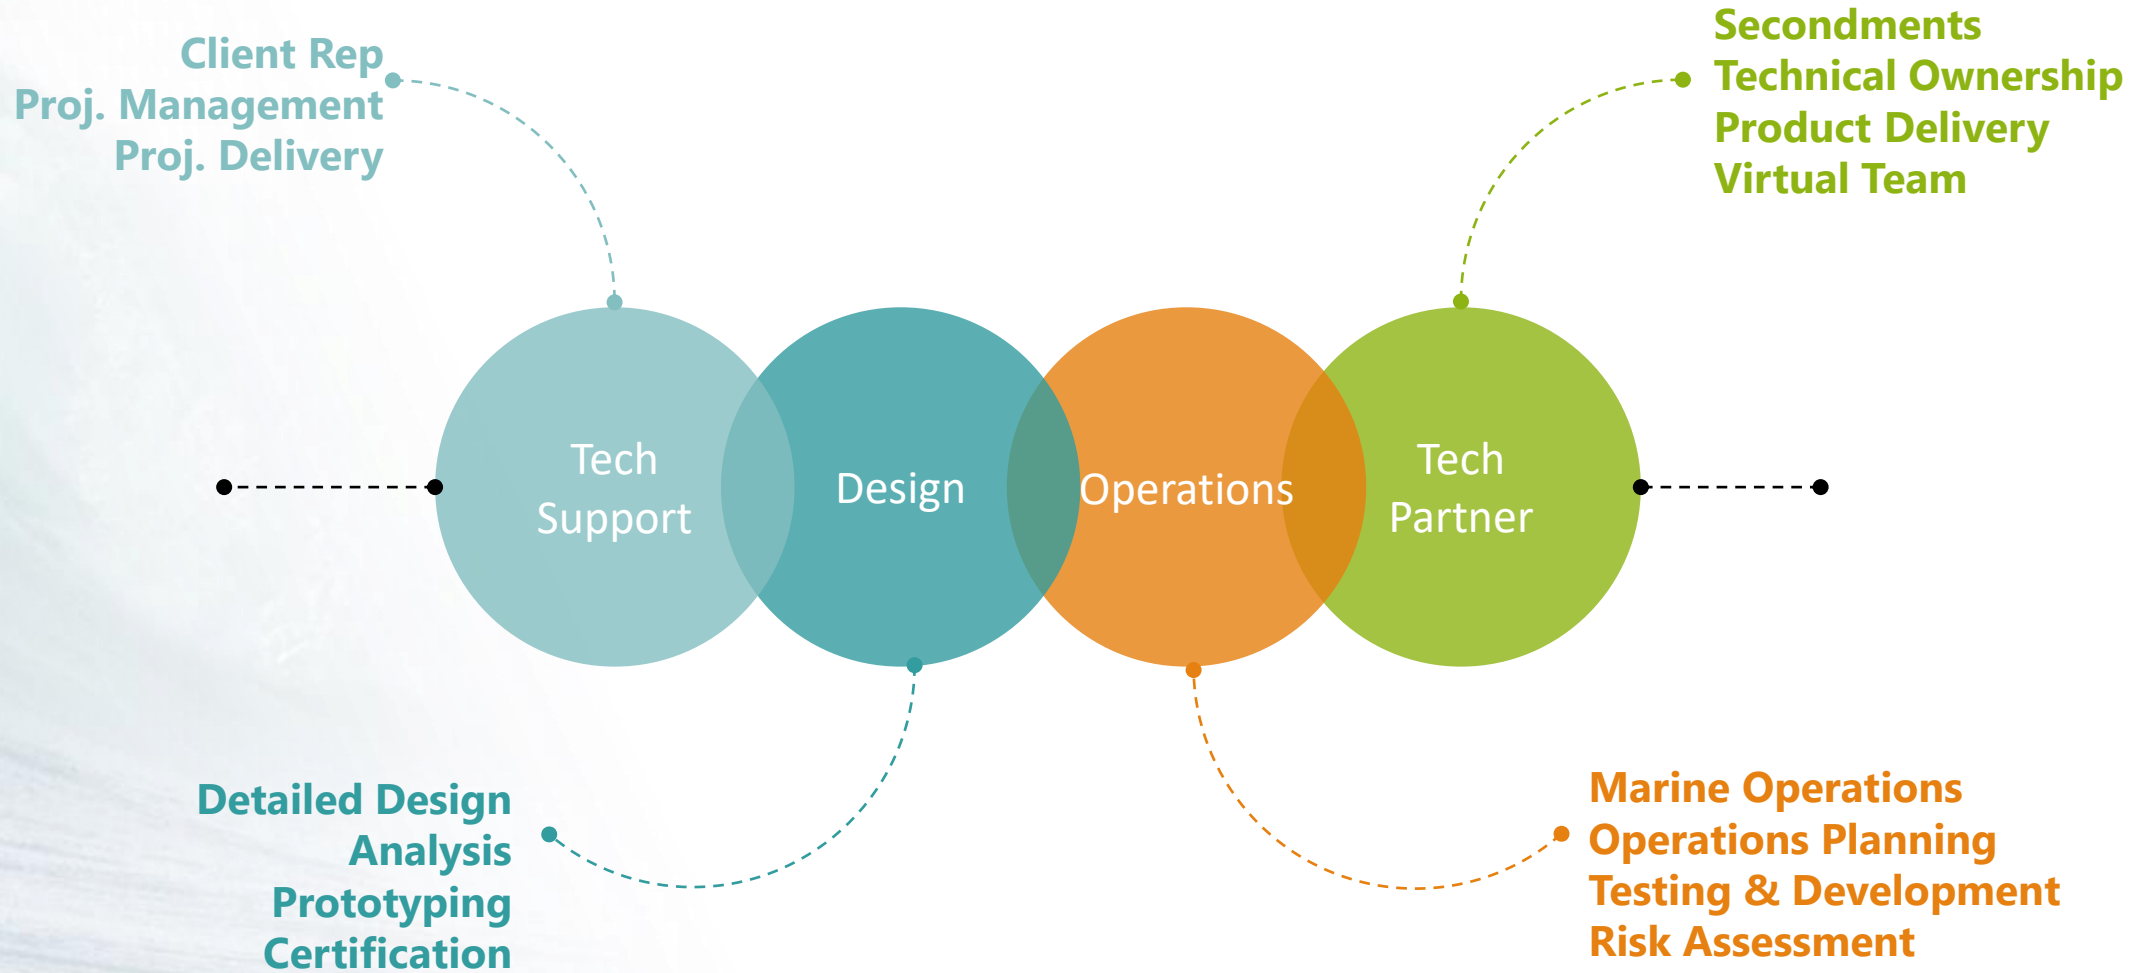

7 x generations of tidal turbine system design

4 x generations of marine asset & installation vessel operation.

24 x safe turbine installations / recovery on real tidal sites.

5,000T x steel fabrication – delivered into the water.

Key Offering
